Income Share	30%*
Early Exit Fee	-

*: USD value of investment amount

Comparative Performance Table

	5/5/2020	31/01/2022	USD 100.000	% Difference
BTC	\$9,003	\$38,483	\$427,044	327.44%
ETH	\$206	\$2,688	\$1,304,850	1204.85%
BTC/ETH	\$1.00	\$8.66	\$865,950	765.95%
BV Spot	\$1	\$7	\$700,000	700%

Previous performances of the basket cannot constitute an indicator for performances of the future period.

BITCOIN (BTC)

Is the first decentralized, largest market size cryptocurrency. It provides value transfer over an independent blockchain network without any connection to an authority. It is traceable, transparent, high security and protected against censor and fraud.

ICON (ICX)

The icon allows the data transfer between blockchains over a blockchain network with the help of smart contracts. These are called cross-chain. ICX coin is used to execute smart contracts.

WALTONCHAIN (WTC)

Waltonchain uses radiofrequency data to create a secure and nonconvertible supply chain over its own blockchain network. Businesses can develop their own supply chain for their own sectors.

SONM (SNM)

Sonm allows the rent of processor power over its own platform. This platform works as a processor power market, people who need processor power can rent from owners with processor power by using SNM coin. Transfers are protected by smart contracts.

BEAM (BEAM)

Beam allows user privacy by using the Mimblewimble protocol. Since Bitcoin and other currencies provide partial privacy, it allows users to choose how much of their data to be exposed.

WANCHAIN (WAN)

Wanchain provides an existing foundation that allows interoperability which allows various blockchain networks to operate transfer data between themselves for decentralized finance.

POLYMATH (POLY)

Allows tokenization of bonds and debentures over its own network. Created tokens must be compatible with regulations. Therefore, it allows the trade of traditional derivative instruments over the blockchain.

MENAPAY (MPAY)

Is used especially in the Mena Region (the Middle East and North Africa) within the framework in line with the Islamic rules and allows users and businesses to process payments among its users.
