

Product Introduction and Content

Metaverse and NFT-Gaming Digital Asset Basket provides investment opportunities to platforms chosen by BV Crypto Investment Committee that will release new NFT game projects at an early stage. Assets in the basket are distributed between invested game projects' tokens and the project's platform that are gone to the public. Allocation of the basket is designed to maximize high multiplier returns that may be gained from the game tokens and to minimize the effect of platform tokens on the basket price. While game projects provide advantageous prices to early-stage investors, they also allow the sale of tokens within a long-term plan. Therefore, NFT-Gaming Digital Asset Basket is an eligible product for investors aiming for long term and high risk - high returns.

- Opportunity to become an early-stage investor at rapidly growing Metaverse and NFT gaming projects.
- Secure and effective investment opportunities through BV Crypto's experience on cryptocurrency trade and game technologies in this market where thousands of game projects are released every day.
- Access to wallets that designed for invest in game projects based upon different blockchains
- A return expectation above the cryptocurrency market's return potential in the medium long term.
