

Product Information and Content

BV Ethereum Cross product invests 50% in ETH and 50% in cryptocurrencies of blockchain networks that have the potential to be an alternative to the Ethereum network. In addition to investing in cryptocurrencies of blockchain, Ethereum Cross product can remain liquid to wait for repurchase opportunities depending on the trend changes on market. During the periods where the basket is liquid, assets in the baskets are evaluated as Liquidity Provider (LP) in stablecoin parities in DeFi pools. This way, in the periods where repurchase is expected, high and stable USD income is aimed.

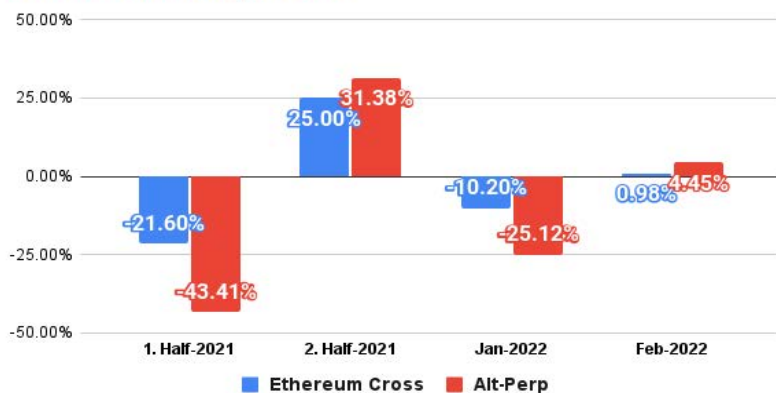

Benefits

-  Differentiation from traditional investment methods.
-  Opportunity to safely enter to the investment world that evolves through technological developments with innovative products.
-  Pre-allocated portfolio to evaluate trade conditions optimally.
-  High-income opportunity above the threshold value.
-  Investment committee comprised of crypto world investment and security experts.
-  Instant monitoring of portfolio and performance with BV Crypto App.

BV Crypto

Investment in cryptocurrencies especially in our rapidly changing world with the pandemic has gradually become essential to investment baskets due to reasons of providing much more higher performance compared to traditional investing tools, and convenience to the necessities of the future's financial world. BV Crypto is the only corporate structure in our geography that accurately directs cryptocurrency investors to invest in right digital assets, allow investors to keep their assets in safe environments against cyber-attacks and provides technological infrastructure support.. Find your place in the new economy not only with BV Crypto's "Maximum Security" investments at fixed and absolute return products, but also with "Digital Asset Baskets" that invests in different scenarios of the cryptocurrency market and rapidly developing new application fields such as Non-Fungible Tokens (NFT) and Decentralized Finance Markets (DeFi).
